

BRAZIL: The Macaw

The Macaw is a native animal of Brazil – a striking and impressive bird that lives in the South American rainforest

Macaw Facts:

- Macaws are beautiful, brilliantly coloured members of the parrot family
- Many macaws have vibrant, colourful feathers. This reflects their life in South American rainforests, with their green canopies and colourful fruits and flowers
- Macaws have large, powerful beaks that easily crack nuts and seeds, while their tongues have a bone inside them that makes them an effective tool for tapping into fruits
- Macaws are very intelligent birds—they have an excellent talking ability but can also be very noisy!
- Macaws can live up to 100 years

Colour in your own Macaw!
